The theme of the fair in 2019 was HealthTech and HealthRobotics. The slightly more traditional industrial robots will also be on display. The latest innovations in robotics are related to exoskeletons, ie wearable support straps that provide more power to the user.

- The Robocoast Automation Events will present the latest solutions for the following situation, among others
- Where to find the new wearable technology?
- How does artificial intelligence help monitoring your well-being?
- How to practice an emergency in virtual reality service?
- At the fair, you can enjoy the drinks offered by the drink robot. Children have a possibility to explore the operation of LEGO robots. The Robotcoast Automation Event people have the possibility of exploring short autonomous bus ride.
