

A Company need: How to educate staff to work with the new robots in order to fully utilize their new features?

VAMK (Vaasa University of Applied Sciences) answer to this:

VAMK has well equipped Robotics laboratory where RoboAcademia small group courses can be arranged in safe and effective way in collaboration with Your company and the manufacturer of robots.

For example: We're the only ABB partner in Finland for their education courses. Education to ABB robots can be done with flexible timetable in the small groups. Costs of the education is usually shared between the company and ABB.
